Text: **Prealgebra Textbook by College of the Redwoods**
                  The textbook is recommended but not required for this course. It is recommended you
                  read the sections covered in the schedule on the night before we cover the section in
                  class. PDFs of the textbooks sections will be available online.

Student Learning 1) Demonstrate and apply a systematic and logical approach to solving
Objectives: arithmetic and geometric problems.
                  2) Demonstrate and apply the knowledge and skills required to select
                     the correct introductory formulas, procedures, and concepts from
                     algebra and geometry and use them to solve problems.

Exams: Five exams will be given on the dates indicated in the schedule. There will be no
                  early, late or make-up exams. If an exam is missed under <u>extreme</u> circumstances and
                  for a very valid reason, please come speak with me to see if alternative arrangements
                  can be made.

Homework: Students will complete Homework assignments on MyOpenMath. Assignments will
                  be assigned almost daily. Assignments will become available at 8:00am and will be
                  due the next day at noon. No late work will be accepted.
                  Course ID: 16016   Enrollment Key: judson

Groupwork: Students will often work in groups. Sometimes this work may be at the board. This
                  work will largely be graded based on effort. There will be no make-up group work
                  allowed. If you are going to miss class for any reason you must inform me by email.
                  Be sure that your email contains the date of the absence and your reason for missing
                  class. Emails should be sent prior to the date missed. Due to some circumstances this
                  may not be possible and the email must then be sent at the earliest opportunity.

Final Exam: A two-hour comprehensive final exam will be given. A student who misses the final
                  exam and does not contact the instructor will receive an F in the course.

Accommodations: Those of you who need additional accommodations due to disability, campus-related
                  activities, or some other reason, please meet with me during the first two weeks of
                  class to discuss your options.
